Date \_\_\_\_\_ Location \_\_\_ Folly Barn\_Map Reference \_\_\_\_\_ Subsequent dates \_\_\_\_\_

Having started with the details of the exact location of the site so that the emergency services can be told where they are required we start our assessment at the entrance to the site.  
How will this affect other road users?

Will vehicles be able to leave the public road at a reasonable pace ( walking speed ) and will they be a hazard to people already on site as they enter the site?

What arrangements have been made to ensure that members, officials and instructors know where to go?

Is anyone going to use a vehicle during the rally, if so is it really necessary?

How are horses and pedestrians going to move about the site, take particular note of the start and finish of the rally?

Access for first aid vehicles must also be considered at this stage, may only be for a NHS Trust ambulance to collect a casualty.

Are there public rights of way, footpaths or bridleways across or at the boundary of the site?

What action needs to be taken to stop a loose horse leaving the site and going onto a public road?

Next we consider the layout of the rally site. How will people, horses and vehicles move about the site?

Do we need to have horse and/or vehicle free areas? Is signage adequate?

Are we doing anything to instruct or amuse parents? Are any members using stabling on site?

## THE PONY CLUB RISK ASSESSMENT CHECK LIST – RALLIES

Now we consider the structure of the rally, what are we aiming to teach the members?  
 How will the instructors be given adequate information about their ride and what to teach them?  
 When children are left at the rally by their parents do we have contact details for the time of the rally?
